

Hi. I am a flight attendant for America west airlines and am writing to say that I strongly oppose allowing cell phone use during flight. First, there is no concrete evidence that these calls would not interfere with navigation systems. Second, potential terrorists could use phones/blackberrys to communicate/coordinate attacks onboard or from the ground. Third, flight attendants have enough safety related issues to supervise/take care of on the aircraft. Fourth, I imagine there would be more onboard incidents due to pax annoyed with each other's cell phone use. Please do not allow cell phone use during flight, this is a crazy and potentially very dangerous idea.

Thank you.
